

Project: _____

Type: _____

ProPoint Kontour Rhythm RGBW

The Traxon ProPoint Kontour Rhythm is a slim, DC 24v powered flexible tube that is omni-bendable on both the horizontal and vertical axes. Its high flexibility is perfect for any curved surface or freeform installation, as well as straight highlighting applications for low-profile, high impact illumination.

ProPoint Kontour Rhythm is available in customizable lengths and cable feed locations. Controllable in 76mm / 3" segments, it can be used to distinguish facades, walls and architectural borders with a concentrated, even radiance, or can be used to create a dynamic river of light flowing along ceilings and walls.

This product is intended for use in high-quality colored light applications.

Product Specifications

Models	ProPoint Kontour Rhythm RGBW
Light Source	High Intensity SMT RGB 3-in-1 + White LEDs
Color Range	RGB+W (White CCT: 4000K)
Pixels	Min. 7 PXL – Max. 65 PXL
LED pitch	12.7 mm / 0.5" (6 sets of LED per pixel)
Pixel Pitch	76 mm / 3" per pixel
CRI (White LED)	≥90
SDCM for White LED	3-step
Luminous Flux	457 lm/m (137 lm/ft) RGBW full on
Efficacy	25 lm/W (RGBW full on)
Beam Angle	115°
Housing	UV resistant silicone
Dimensions (W x H)	23mm W x 23mm H / 0.9" W x 0.9" H
Dimensions (L)	Min. 540mm / 21.2" (7PXL); Max. 4959mm / 195.2" (65PXL)
Weight	0.5 kg/m / 0.33 lb/ft
Mounting	Various mounting brackets and channels
Min. Bend Radius	300mm / 12" - Omni-bend in any direction
Twist Angle	Max. 360° per 1000mm (39.4")
Regulatory Listing & Safety Approval	UL, CE, UKCA, RoHS, REACH, ANSI 3G, IK07
Operating Temperature	-30°C to +55°C / -22°F to +131°F
Storage Temperature	-40°C to +80°C / -40°F to +176°F
Environment	IP67 Outdoor Rated; suitable for coastal environments
Humidity	85%, non-condensing

Electrical Specifications

Input Voltage	DC24V
Power Consumption (Typ.)	18W/m / 5.5W/ft

System Specifications

Control	UCS8904B 16bit protocol provided by e:cue SYMPL pixel Node
Power Supply	Remote 24V DC

LED CHARACTERISTICS Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over time – a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicate function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product contains a light source of energy efficiency class G to Regulation (EU) No 2019/2015.
Lumen measurement complies with LM-79-08 standard.
Lumen maintenance is calculated based on LM-80 compliant measurement.
